

Daphne Comeau  
Greene  
LD 2106

I affirm my support of LD2106 and want to urge Maine lawmakers to pass this bill in the name of the protection of the privacy of students, patients, and children in child care by protecting the information in the places where they learn and seek care.

Failure to protect the information of the people is a failure to protect the people. You are not faced today with the question of reporting to Immigration Enforcement; you are faced with testing the Constitution itself: Will our constitution hold up to that test?; will you vote to protect the right of privacy that the constitution of the United States grants its citizens, by extending that protection at the state and municipal levels? In this moment, failure to protect the privacy immigrants is a failure to protect all. When people come to our state to live, let us not stand in the way of their healthcare, their ability to work, or their education. Thank you.
