LD 2106

I am in support of passage of LD-2106. Feeling safe and free of fear as citizens and legal immigrants is essential to being able to perform at work.

Currently in the hospitals of Sanford and Portland workers are afraid to leave their homes to go to work leaving hospitals short of staff.

Who do you think preps surgical rooms sterility, cleans patient rooms, cleans up hazard waste like blood, runs the laundry service, techs, nurses, and other medical staff....legal immigrants many who happen to be people of color.

Ethically and morally this bill should become law in Maine. From strictly an economic view point this bill should become law in Maine.

Thank you.
