There is no place for ICE in Maine, but especially not at locations where individuals are most vulnerable such as schools, hospital facilities and libraries. These locations should be sanctuaries of safety, health and learning, not another space to be feared. It's a corrupt system that terrorizes and kidnaps while blaming the victims with racially charged stereotypes to justify its own illegal, unconstitutional and despicable actions.

As a constituent of Maine, I support the passing of this bill to strengthen the safety of the aforementioned locations. We are a better and stronger state when we support our fellow Mainers, regardless of where they're from.
