LD 2106

I'm writing to support this proposed legislation. It is imperative for the safety and well being of our Maine community that ICE operations in Maine be handled within the bounds of our U.S. Constitution - this means ICE cannot enter onto property without a judicial warrant; the right to know why one is being detained; the right to obtain counsel; and the right to be detained in a safe manner. As we've seen in video and witness reporting, this is not happening. An 18 year old USM detained in a parking lot; a civil engineer being dragged out of the window of his car and his car left running in the street; correctional officers that have been vetted being taken off the street. None of this is ensuring our "unalienable rights of Life, Liberty and the pursuit of Happiness".

If the federal government cannot or will not ensure proper due process, then we must do it ourselves in Maine! Please vote ought for LD 2106.
