LD 2106

I am writing to express my support for LD 2106. As an educator and parent, the safety of our schools is incredibly important to me. Access to education, and the ability to attend school without fear for one's safety is a right all children have. Schools not only educate students, but also feed them and create stability for them. It is imperative that we protect that right for all children in Maine. Schools, hospitals, and libraries are community gathering spaces offering vital resources and services - ensuring that all members of our communities feel safe in these spaces is imperative. Parents should feel safe dropping their child off at school, knowing that their child will be there when they get back, and that they themselves will not be taken away for dropping their child off. People should feel like they can seek the medical care they need, without fear of being abducted by ICE. Pass LD 2106, and protect these vital spaces in our Maine communities.
