Yarmouth
LD 2106

I am asking you to support LD 2106 in protection of students accessing safe education and for all immigrant residents of Maine to gain access to much needed services. ICE should not be allowed to enter schools, hospitals, daycares or libraries. These are places of access and safety for all. In our schools, we provide more than education - these children and staff have access to food, mental and physical health resources, and a supportive community; and this should be protected. The DHS ICE program and agents have demonstrated multiple times to be unskilled, unlawful, and irresponsible with human rights. There is no place for ICE in our schools.

Please take action to support Maine's children by doing what is right and within your power as our representative voices.
