

Sarah Taylor  
Waterville  
LD 2106

Dear committee members,

I wholeheartedly support this bill, LD 2106.

ICE must not be able to conduct operations in spaces like libraries, hospitals, and schools without a judicial warrant. These spaces are essential, and people not being able to access them without fear is monstrous.

No one should be afraid to seek medical care, send their children to daycare/school, or connect with community resources.

If ICE is allowed to access these spaces without a valid judicial warrant, people will be harmed. That's a fact. People won't get the care they need, won't be able to access essential services, won't be able to care for their families.

Please, I'm begging you to listen.

Thank you for your time.
