Freeport
LD 2106

I am testifying in favor of LD 2106 to ensure the rights of children to attend school, medical facilities, libraries and other public spaces without fear for themselves or their family members. It is critical to maintaining the fabric of our communities. We must reinstate and uphold long standing, common sense policies agreed to by both Democratic and Republican Administrations before Trump. LD 2106 will ensure due process is served and judicial warrants are needed before entering public spaces to remove law abiding residents. Please help ensure that all people can have safe access to public services and get their basic needs met without fear of unlawful abduction.
