LD 2106

I would like to state my support of LD2106, being aware of the urgent need to protect people in the kinds of public spaces that are enumerated in this bill. The danger and fear experienced by individuals who are being seized as they go about the essential activities of their daily lives indicate to me that it is urgent that this legislation take effect as soon as it is approved.

I am in favor of any legal means that our state can exercise to protect vulnerable people in Maine from unwarranted seizure of them or their personal information.
