LD 2106

I would like to urge committee members to support LD 2106 to make it clear that private areas in public schools, hospitals, libraries, and daycare remain safe places. These areas should need a legal warrant for entry by immigration officers seeking to apprehend people. Clear guidance needs to be provided to employees of these institutions to insure the rights of individuals seeking care, education, or community interactions. Maine needs to protect its legal immigrants and citizens and allow them the freedoms stated in the constitution. Thank you for your consideration of my written testimony.
