LD 395

I am writing to express my support for LD 395. It is essential that the state of Maine allows the Wabanaki Nations to access the resources that are their right as tribal nations. It is beyond absurd that the state, built upon stolen land from these nations, limits access to these resources. This is not only morally wrong but harms all inhabitants of the state - those who stand to benefit from the resources directly and those who would see downstream economic benefits from their use. Please work to pass this bill into law at once.
