

Bethany Cousino
Scarborough Fire Department

My name is Bethany Cousino and I work full time as a Paramedic and Firefighter for the town of Scarborough. I have been in my current position for 12 years. I am asking for the Legislature to support LD 213 as it is written. Although females make up a smaller number of firefighters in the state of Maine, we are at the same risk of developing occupational related cancers as our male counterparts. This is our opportunity to get fair coverage for reproductive cancers that male firefighters are already covered for. We do the exact same job as the male firefighters and we deserve the same protection.
