Portland

This legislation must pass. It's a failsafe means of keeping houseless Mainers safe and healthy, and this legislation could potentially lift many houseless folks out of poverty. My houseless friends and neighbors need this more than ever, and with the pandemic exacerbating their struggles, I'm terrified that they will get sick and die or freeze to death. Taking care of our community is central to our Maine ethos, so please pass this legislation to care for our houseless friends, family, and neighbors.
