

Meagan Letellier
Portland

As a full-time firefighter paramedic for the city of Portland, I am looking to support a change in the legislature that supports including female reproductive organs for coverage in the presumptive cancer act. For the past 13 years I have worked alongside my male counterparts doing the same jobs day in and day out. After attending the first annual women's firefighter conference in Boston, it was brought forth that we do not have the same equal rights under the current legislature; that the current bill only supports male reproductive organs. I hope that this testimony helps support all active female firefighters and those to come down the line as the future in public safety.

Thank you for your time!

Respectfully,
FF/Paramedic Meagan Letellier
