UA Local 716 Plumbers, Pipefitters & HVAC/R – Recruitment/Business Development

This OSHA 10 regulation is much needed in our industry. Being highly involved in the recruitment world of workers and businesses I see many avoidable safety violations on many different projects that I have visited. The cost for this type of training is \$25.00 or less per person. This is an exceedingly small price to pay to make sure all workers go home at night to their families.

Safety doesn't cost it pays!
