Testimony of Greg Payne

On behalf of the Maine Affordable Housing Coalition

Before the Joint Standing Committee on Labor & Housing

In Support of LD 1240: *Resolve, To Review Barriers to Regional Solutions for Housing Choices*

April 16, 2021

Senator Hickman, Representative Sylvester, and members of the Joint Standing Committee on Labor and Housing, my name is Greg Payne. I am the Director of the Maine Affordable Housing Coalition (MAHC).

MAHC is a diverse coalition of more than 135 private and public sector organizations including developers, architects, engineers, builders, investors, community action programs, public housing authorities, housing and service providers, advocates, and others working to advance solutions that create and preserve affordable housing in Maine.

MAHC supports LD 1240 because we need a broad array of housing choices and approaches in order to address our state's enormous housing challenges, and the review which would be undertaken pursuant to this Resolve would help governments and practitioners alike to better understand our options.

As a supporter of and participant in the work of the Maine Climate Council, we also strongly endorse efforts to make future housing investments compatible with its recommendations. Since residential buildings are responsible for such a large share of our state's carbon emissions, our new construction, adaptive reuse, rehabilitation and weatherization activities must be undertaken with climate impact in mind.

Finally, as municipalities around the state wrestle with their own planning and growth challenges, we believe that strategies identified through the study directed by LD 1240 could serve as a highly valuable resource for their efforts.

This bill is a part of a wider set of initiatives to improve on our state's approach to housing and land use planning, and we believe it deserves the Legislature's support.

Thank you for your consideration, and please do not hesitate to contact me with any questions.
