Hello, First of all This bill violates "Home rule" and municipalities' rights. This bill only expands housing for very low income Mainers while leaving the first time owner out of the picture. This bill will increase housing stratification. Additionally, This bill does not address our workforce housing problem as it strictly limits income of both potential renters and home buyers. Finally, This bill is bad for Maine if you are looking to expand our population to the younger and working class.
I ask you please, vote ought not pass.
