

Cynthia Dechenes  
Brunswick  
LD 2003

I'm submitting my support for LD2003, as a family physician, and as a member of the Board of Directors. In these roles, and as a citizen, I am seeing the cruel impact of lack of housing on patients and our communities. We cannot continue to ONLY build and offer housing to people who can afford exorbitant rents or \$600K homes. We cannot attract young families or house single adults. Re-zoning and creating tax incentives for affordable housing development is key to solving our housing and labor problems. Thank you.
