

R H
Rockland
LD 2003

The suggested legislative changes solely hurt Maine residents who have generationally cared for Maine. The only people who benefit are government workers and politicians.

Crime will increase, taxes will increase, and traffic will increase.

School quality will decrease, as will quality of life.

There will be untold and unforeseen consequences on the environment, and the long standing basic functionality of the town.

The changes that LD 2003 would allow would turn all towns across Maine into the very worst parts of Lewiston, Portland, and Bangor.

Allow towns, and the people within them, the ability to organically grow and adapt to changes as necessary. This legislative forced way forward is political, insensitive, and harmful.

Please oppose this short sighted and ignorant piece of legislation at all costs.
