LD 2003 "Ought not to pass".

If we allow a housing zoning system that does not allow local control and promotes unfettered state wide growth, what can we expect? We must preserve the character of our rural and suburban housing stock, a strong social backbone of Maine. High density housing belongs in the larger cities where social support systems are already in place. A state housing committee located in Augusta should have no control over the character of neighborhoods of the likes of Machias, Millinocket or Monmouth.
