

Don LeFante
Cape Neddick, ME
LD 2003

I expect that you will dispose of LD 2003. This bill, if passed, will destroy the character of Maine's communities. State control is never a good idea. Maine citizens know what is best for them. What Maine needs is development of small communities of individual housing to support families that would like to raise their children in a rural setting. Housing density simply changes the demographics, would unduly burden our schools and local services, and introduce transient people that have no equity in community. Cut the crap and stay out of our lives.
