Kennebunk
LD 2003

I oppose LD 2003 or any bill that would allow local zoning ordinances that protect single-family neighborhoods from high-density Section 8 apartment projects to be overridden by some newly established Municipal Housing Development Permit Review Board. I am a homeowner and live in a quiet and peaceful neighborhood. This will destroy the peaceful environment of Maine and the government is encroaching on who will live here, devalue our property and use taxpayer money for something that we never voted to have. It is reprehensible that those people that are supposed to be working for the people are trying to put forth legislation that will destroy the lives of the people they are expected to represent.
