

Jared Bristol  
Hebron  
LD 70

I taught your middle school children for 25 years with 3 degrees in science, psychology, and half a Masters in education for very minimal wages considering. As per usual, my retirement benefits are squeezed while inflation eats up double or triple any COLA. How about treating us better? I ask that you "Ought to Pass" this bill, LD-70. Now, at age 77, things are difficult for my wife (also a retired teacher of 32 years 2nd grade) to get by and anything would help. How about reducing lots of other spendthrift spending instead?
