

David Hynd  
Thomaston

I am a licensed clammer on the St. George River and pay the license costs to both our town and the state. I also do 10+ hours of conservation time to maintain this license. I am behind LD 454 bill because the depuration groups that are digging the river yearly are not paying an amount high enough to cover the warden costs, which the local license holders, are paying. We need this consideration to keep our local program affordable and working.

Thank you,  
David Hynd
