I oppose LD1146 because it will take money out of my pocket and food off of my table. My family and i rely heavily on income from aquaculture and we have always done so without interrupting any existing vocations in Maines working waterfront. we have always felt that the DMR has a good handle on the leasing process and have never had an experience that indicated the system was broken. Maines working waterfront and downeast maine in particular cannot afford another set back. LD1146 is forcing us Maine locals against eachother with misinformation. I trust the MAA to find sufficient solutions without derailing the aquaculture industry in the process. I feel that the folks behind LD1146 are not being honest with their intentions or their sources.
