

PETER FRANCISCO
WEST BATH

I am opposed to LD1146. As an oyster farmer, now operating for 7 years I am still in the building stage. I have invested heavily both in terms of sweat equity and personal finance. My family has been involved as well. I have had a good measure of success and look forward to the continued viability and expansion of this farm. It is my hope that we will be able to build, with my family's involvement, a farm for their future benefit and a farm that will be beneficial to our town and state.

I am very concerned about a bill such as this that lacks specifics and gives us no way of knowing how we will be affected in the future. I hope this bill can be defeated and then rethought and reworked in a manner that can be readily understood and that can be beneficial to all.
