I'm writing today in opposition to LD1211. This is another attack on aquaculture and commercial fishing, two important industries that make up Maine's integral working waterfronts. The makeup of the commission in LD1211 ensures that the interests of the people in the working waterfront community will be in the minority and intentionally marginalized.

The intentions of this LD, along with LD1146, are deceptive and I encourage you to vote ought not to pass.
