

Ld 710

I normally don't support tax dollars be spent for a private business legal expense but This is more than just the lobster industry.

The attorney general should be suing NOAA on behalf of the state of Maine just as the attorney general of Virginia did and won his case. He should sue NOAA as a complainant. If he did we probably wouldn't need this bill.

Losing the Lobster industry is more that just going to affect just one industry it will also affect the Boat building industry and also the restaurant industry many people will lose their jobs Believe it or not many people don't know where Maine is but they do know Maine lobster is the best

For these reasons I ask you to support LD710 and help the state of maine

Thank you
