

Eileen Kreutz
Industry

I am submitting this testimony regarding increasing the number of Franklin County Commissioners. I live in Industry and see so many needs that are not being addressed by the current small committee of three. If there were a minimum of five members, country residents might stand a chance of having their urgent local needs met.

I have attended meetings of the County Commissioners and Budget committee meetings and it feels that if there was an increase in membership, there would be more representation for our geographically large county.
