

William Kenniston
Livermore falls/Beacon For Sovereignty

Good day I wanted to make my voice heard here because due to the miss use of the covid pandemic hysteria public meetings have been shut down! This miss use of power has got to stop. Our Governor is out of control and our legislators have allowed this to go on for far too long. Our state is suffering our people are suffering, our children are being being hurt by these policies! You do not force people to live like this! There are many place that myself and close friends can not go due to these 1984 style mandates. Why can't we make choices for ourselves? What gives you the right to tell people how to manage their health? There is more prof that masks are either useless or more harmful than beneficial. Even if they did work it should be a choice! No one is afraid of this virus they are afraid of getting in trouble and that's so sad! We are at a tipping point and if the legislators don't do something to restore individual liberties they will be replaced! There is a massive grass roots movement on the way and you all better get on board or say good bye in 2022!
