

victoria gavel
lyman

to sen. baldacci, rep.matlack and members of the state and local government committee.
my name is victoria gavel from lyman maine.im writing in support of the bills before you that take unilateral power away from our governor mills.i know nobody knew what was going to unfold just about a year ago when it was voted unanimously by the report of one of my reps, to give governor mills emergency powers.It is clear to me she hangs onto them to this day to dictate misguided mandates and extentions of power for the wrong reasons, and to play patician games with we the peoples lives, and businesses in the balance.some to never recover and have closed.please take the power back from her.there has to be a balance.we need common sense solutions.we the people are getting frustrated by not being heard, and even if you do hear us it seems all the party line ayers are protecting her.please vote to enact measures that give everyone a say.we dont have to always agree, but there are ways to find common ground.its unfirtunate this state of affairs has left so many people feeling hopeless and without a voice.its time to stand up to general mills.thank you.
