LD805 Aught Not To Pass

This proposed law would not make voting safer. It would make voting less safe. Gun Free Zones are a failed experiment. A prohibition on firearms in polling places would encourage terrorists by ensuring a of unarmed victims.

Firearms are carried responsibly by thousands of Mainers every day without incident. This law would require them to disarm prior to voting, requiring unnecessary gun handling in the parking area or elsewhere. There is no upside to that.

This law is a direct violation of the Maine Constitution. The bearing of arms shall not be questioned, and this bill questions that right.

Vote "aught not to pass" on this bill
