Members of the Maine State Legislature, what on earth are you thinking?! This is an absolutely idiotic idea and whoever came up with it should be immediately expelled. We are currently living in a time where federal/state officials nationwide and major media outlets warn us constantly about "dangerous misinformation" and yet more and more frequently are caught out espousing THEIR OWN MISINFORMATION. This begs the question of just who will be the arbiter of what is and what is not misinformation and in any situation will obviously lead to a bias in information control. I've been watching this soul crushing Orwellian nightmare play out on the national stage and knew it would inevitably, much to my disgust, come home to roost. A few years ago, before the onslaught of suffocating pc culture began, this was a non issue. Why? Because grown adults have the right to determine for themselves what is and is not accurate information without being arbitrarily told what information they're allowed to digest, what they're allowed to think and what they're allowed to say. To the author of this bill, get a life and start looking for other work. You do not belong in the legislature.
