Auburn

Does the phrase, "We are all in this together" resound with the committee? Many people died as a result of the lockdowns, least of which are the people who died in many ways like those who were never able to get treatment for other diseases while waiting to be seen, or those elderly who died of loneliness and starvation - failure to thrive - as they couldn't visit with their loved ones, or those that died from suicide and drug overdoses brought on by stress and abuse?

This bill ought-not-to-pass unless it includes ALL lives lost during this unfortunate time.

Thank you.
