

Richard Hornor
Bristol, ME

As a vacation home owner who uses his property for personal use as well as short term rentals, it would have a significant negative impact to my financial situation if suddenly I could no longer rent my property. The ability to generate income when I am not using the property was fundamental to the economics of purchasing the home. If you prohibit this, it will significant hurt me financially. It would potential impact the value of the property because Short Term Rental is the best use of the property. Bristol population approximately triples in July/August and restricting Short Term Rentals would greatly impact the tourist dollars the area is highly dependent on.

I am in favor of LD1365
