

Linda Reardon
Orrington

This bill should not be allowed to pass. Not only are virologist and biologists studying this so virus but it may not even exist only a different type of flu strain. And the Maine CDC and Federal CDC have skewed numbers so badly there is no REAL scientific evidence or facts to prove who died from what. I've researched this so called pandemic which was deemed an outbreak only by the Federal CDC months ago and they have walked backed the deaths from ACTUAL Corona to 11000 country wide. Time for real research statistics and facts
