

Gary McGrane
Jay

Good morning, Senator Baldacci and Representative Ann Matlack and other distinguished members of Joint Standing Committee on State and Local Government. Today I testify in support of L.D. 895 as was originally voted on by the people of the Franklin County, State of Maine.

It is my belief that the districts should be most closely aligned by population density rather than geographic preference, therefore the map that passed with the bill in November should be adopted as originally supported by residence in Franklin County.
