

Larry Crosson
Lisbon, Maine
LD 2167

LD 2167 does not deserve the light of day. It does not stop a single illegal from entering our state. It does not take any form of action to hold the current administration(s) accountable (State or Federal) for this invasion. It does not bring so much as a single penny to the state coffers to pay for these illegals. In fact LD 2167 proposes the tax payers of Maine should fund the "Office of New Americans". For the record illegals can not be described as "Americans". That title is exclusive of every single citizen in the United States as well as every immigrant who honored our Republic with legally compiling with US Immigration laws. Period.

This shine new bill only creates the illusion of addressing the crisis with yet more government. To quote one of the bills supporters "It is about understanding who is coming to Maine, how much it is costing us". Hello....seems to me that should have been addressed BEFORE they started arriving. Kinda like trying to count the horses after they have already got out of the barn, don't you think.
