LD 2167

This bill, 2167, is incredibly tone-deaf. Mainers are struggling to heat their homes, afford groceries, pay their electric bill and just LIVE. Creating a new 'office' to both support new-commers we can't afford and pay more officials our hard-earned money is not the answer, and honestly is a slap in the face to all of us Mainers that are struggling. Take the money this 'office' and that goes with it will cost (OUR money, by the way) and put it towards actually helping Maine people that are struggling. Immigrants are getting new housing built for them, free rent, medical care etc. When is it Mainers' turn to be helped?
