LD 1383

As a constituent, I call for the committee to pass LD 1383. The Maine PERS is designed to help the people of the state. Investing money into evil corporations that contribute to heinous acts that help ICE in any way, or fund acts that go against human rights, directly contradicts the entire reason the Maine PERS exists. We need to do better for our people. I do not perform the research that I do with the assumption that my existence contributes to these awful ideologies. The entire purpose of my job is to help create a better ecological environment. The state has proven they care about important principles to contribute to a better future. Those efforts should not be limited to the natural world and should continuously expand into society to benefit human lives. We should not sit idly by and support oppression of any kind. It is time to make these important changes and push through for a better future. Thank you for your time.
