Newcastle
LD 1383

I am writing this to testify in support of LD 1383. Financial support of genocide and violence, whether done directly or through investment in third party actors, is not just complicity in genocide and violence, but participation in it. My tax dollars go to the state of Maine. I do not wish to be a participant in the genocide abroad or ICE violence here. Vast majorities of the people of Maine do not wish to be either. Please listen to them and pass LD 1383.
