I am a retired minister living in Portland. I have been watching with horror the genocide being perpetrated in Gaza for the last years. Doctors being killed while doing their medical work in hospitals. Babies freezing to death because no aid is being allowed in. Children with cancer dying for lack of treatment. Just today, three more journalists being killed while driving their car. As a person of conscience, my heart is broken. Please divest our state retirement funds from perpetrators of human rights violations. It is one small but important step in supporting human rights.
