Brunswick
LD 1383

I am writing in support of LD 1383. I do not want Maine public funds going to companies and entities that are involved in what credible, independent international bodies have defined as apartheid. Maine has proven itself as a state that, despite a wide range of political leanings, comes together on essential humanitarian matters. This must be one of those times -- where human decency comes before all else. Please consider passing LD 1383.
