

ROBERT KIRBY
OLD ORCHARD BEACH

By passing this law it would significantly interfere with our continued success as a Licensed Maine Automotive Recycler and Maine small business.

We rely on this part of the business for continued growth and success, and by passing this law, you would be punishing all recyclers who have become victims of others illegal activity. The issue is the people illegally selling catalytic converters, not the licensed business that follow the state guidelines and laws.. Where are the laws governing the unlicensed people who try to BUY and SELL catalytic converters?
