it is very important that this rail trail be completed. I am 76 and ride my bike and it is now to dangerous to ride on the main roads, due to distracted drivers, etc. I have recently nearly gotten hit by a car several times on route 114. I cannot ride on the roads anymore due to the danger. This trail would be such a good addition for bikers and walkers, etc.

Please help us stay safe and continue to exercise, which is what we all need to keep healthy and safe.

the trail is a pretty trail and would be a delight for future generations.

Thanks so much
