I have lived in Yarmouth Maine for over 30 years. I have also lived in communities that have repurposed old rail corridors for bike and pedestrian use and I have been amazed by the positive impact such repurposing can have. In every instance I have seen such "trails" being used by a wide variety of people ... old and young.... fit and non-fit.... walking.. biking... roller blading..... catching up with a friend while enjoying a nice walk outside in a safe (no car) environment. Because I have seen first hand what a positive impact this can have on a community I am writing to express my full support for the use of the Berlin Subdivision corridor as a bike and pedestrian path for our communities.
