

Chrissy Adamowicz
Brunswick
LD 29

Dear Committee on Transportation members,

I am a Brunswick resident writing to express my enthusiasm and strong support for LD 29. Transforming the rail corridor between Brunswick and Gardiner into a trail for non-motorized uses will expand recreational amenities while promoting public health and economic development.

By connecting Brunswick and Gardiner, residents and visitors alike would gain access to a safe, scenic route for walking, running, biking, and other outdoor activities. Such infrastructure encourages active lifestyles, fosters social connections, and provides accessible outdoor spaces for people of all ages. This trail would also expand our existing network by extending the wildly popular Kennebec River Trail.

Multi-use trails like this have a well-documented history of boosting local economies. They draw visitors and increase foot traffic for local dining establishments. This proposed trail has the potential to become a major attraction, bringing economic and recreational benefits to the region.

LD 29 is a forward-thinking initiative that will improve the quality of life in our communities while stimulating economic development. I urge you to support LD 29 and help build a healthier, more connected Maine.

Thank you,
Chrissy Adamowicz
