I like to walk and hike as much as a lot of people, but not at the expense of eliminating any chance for trains to make a comeback. We have an extensive network of trails already here in Maine. Getting rid of vital infrastructure for trains is not a sustainable way to provide needed transportation alternatives for Mainers and Maine companies. Hiking and walking as modes of transportation are not available to most people. Removal of rails from the Portland to Auburn Rail line will destroy rail service locally and undercut regional rail throughout Maine. Keep the tracks! Please vote "no" on LD 511. Thank you.
