I am writing to support the development of a multi-use off road path connecting Portland, Auburn and Brunswick. As the parent of a blind child, having spaces where we can recreate safely is such an important factor in the quality of his life. This type of path, in addition to being a driver of economic activity, would also be such a valuable resource for those of us in southern Maine. This is exactly the type of project that the state should pursue and we support this unequivocally! Thank you!
