Hi all,

I am writing because I feel passionately that the implementation of an interim trail would be greatly beneficial to not only me, but the community as a whole. As someone who would much rather bike/walk than drive, in large part because of the financial burden of owning a car and the environmental and safety impact driving has, I believe this trail would be heavily utilized, would decrease traffic, encourage strong mental health, and would be a strong space to interact with community. I am certain that the trail would give options to many of those people who don't have the privilege of owning a car to be able to commute to work and to a range of amenities.
